BARAZIN B-MAGINE

Brand new, fresh and crisp - *Ceramic Digital Printing,* is the hottest new trend and is here to stay. This new technology allows you to print images, textures and patterns on any piece* of glass incorporated into your décor. If you can dream it, we can make it happen: kitchen doors , countertops , backsplashes, we can also produce walls.

RECOMMENDED FILE TYPES:
Our graphic artist needs to approve all files before processing.

1. Photoshop file format
High resolution pictures 300 dpi (minimum) of final format to print on the glass minimum resolution should be 100 dpi of final format to print or at 300 dpi at 1/3 of final format to print on the glass

Photoshop file format .jpg / .psd / .gif / .tif

2. Vector Format
This is a high definition design or image from a digital file which allows the technology to be reproduced on the glass.

File format .ai   /   .eps (Illustrator) / .pdf

HOW TO SUBMIT THE FILES:
Transfert your file via https://www.wetransfer.com/ , receiver email should be order@barazin.com

Name your file without compressing the file

Send email to info@barazin.com mentioning the name file.
After the reception of your file, a representative of BARAZIN will contact you.

* Extra-clear glass is recommended so the colors and the sharpness of your image will be enhanced for a crisp and clear resolution.
- * ''B-magine'' is not applicable to any textured glass.
- Additional fees may apply
